ACKNOWLEDGEMENT

Bismillahirahmanirahim,

Alhamdulillah. All the praises to Allah s.w.t with His willing give me the opportunity and also the good health to complete this Final Year Project Report. First of all, I would like to show my great honour and my special thanks to my supervisor, Captain Mohd Naim Bin Fadzil because of his attention and support to me. The supervision and support that he gave me truly help the progression and smoothness of the Final Year Project Report. The co-operation is much indeed appreciated.

My special thanks also goes to Captain Noor Apandi Osnin, Final Year Project's lecturer that give big contribution and spirit for me to complete this Final Year Project report. With the enthusiasm and guidance from him, all the report was submitted before the deadline, also thanks because his willing to help and give idea to complete the report along this two semesters and much appreciated.

Great deals appreciated go to the contribution of my faculty - Faculty of Maritime Studies and Marine Science (FMSM). Not forget, I would like to thankful the Senior Manager Marine Services Department at Port of Tanjung Pelepas (PTP), Captain Akashah bin Md Dom that give permission to collect data from the Port of Tanjung Pelepas and also to the staff that willing to help me in order to complete the report. Not forget, to those who answer the questionnaire, and also to the all lecturers of FMSM.

Last but not least, I would like to thanks to my parents for their supports, cooperation, encouragement, trusted me with all their hearts for the report completion from beginning till the end. Not forget to all my friends and everybody that involve direct and indirect to contributed by supporting my work and help during the Final Year Project report from beginning until complete.

ABSTRACT

Port of Tanjung Pelepas (PTP) is managed and operated by Tanjung Pelepas Sdn Bhd (PTP). The Core business in port of Tanjung Pelepas (PTP) is pilotage and towage services. There are a lots of vessels visits the PTP to load or unload the container. Pilotage services are compulsory to all ship that entering and leaving the port to ensure the safety at port.

The port pilot will take charge and guide the vessel to safely reach PTP's wharf or leave safely the wharf to continue her journey to another port by piloting the vessel according to the safe coordination. Pilotage services are important because navigating the vessel is much easier in the open seas compared to piloting the vessel at port area. But there are some problems the port are facing which are the pilot shortage and the pilots are having too long working hours that brings to another problems such as collision of the ship when the pilot had fatigued. Some recommendations had been made like changing the shift of the pilot which usually working 60 hours per week to 48 hours per week to ensure that the pilot get enough rest and can perform job very well and some calculation of the pilots working hours are shown that the working hour is decrease in order to reduce the pilot workload.

ABSTRAK

Pelabuhan Tanjung Pelepas diuruskan dan di operasikan oleh Pelabuhan Tanjung Pelepas Sdn Bhd (PTP). Perniagaan teras di Pelabuhan Tanjung Pelepas (PTP) adalah pemandu arah dan perkhidmatan penundaan. Terdapat banyak kapal melawat PTP untuk memuat dan memunggah kontena mereka. Perkhidmatan pemandu arah adalah wajib untuk semua kapal yang ingin masuk atau meninggalkan sempadan pelabuhan untuk memastikan keselamatan kapal di pelabuhan.

Pemandu arah pelabuhan akan mengambil alih dan mengawasi kapal untuk selamat sampai ke dermaga PTP dan juga meninggalkan dermaga dengan selamat untuk meneruskan perjalannya ke pelabuhan lain dengan menunjukkan kapal kearah koordinat yang selamat. Perkhidmatan pemandu arah adalah penting kerana pelayaran kapal adalah lebih mudah di lautan lepas berbanding memandu arah kapal di kawasan pelabuhan. Tetapi, terdapat sedikit masalah yang dihadapi di mana pelabuhan itu menghadapi krisis kekurangan pemandu arah dan pemandu arah juga terpaksa bekerja dalam masa yang lama yang boleh membawa kepada masalah yang lain seperti pelanggaran antara kapal lain semasa pemandu arah sudah kelesuan. Sedikit pengesoran telah dibuat seperti menukar syif pemandu arah yang biasanya bekerja selama 60 jam seminggu kepada 48 jam seminggu untuk memastikan pemandu arah mendapat rehat yang cukup dan boleh melaksanakan kerja dengan baik sekali dan sedikit pengiraan tentang masa kerja pemandu arah telah menunjukkan yang masa kerja dikurangkan untuk mengurangkan beban kerja pemandu arah.
