## **ABSTRAK**

Nelayan adalah salah satu pekerjaan yang sangat berbahaya dan berisiko tinggi. Kesedaran terhadap keselamatan amat penting bagi setiap nelayan dari awal perjalanan ke laut dan akhir perjalanan. Kajian ke atas kesedaran terhadap keselamatan dalam kalangan nelayan di Kuala Terengganu adalah berkait rapat dengan kesedaran mereka terhadap keselamatan di mana mereka perlu sedar dengan setiap perlakuan mereka. Projek ini mengadaptasi kaedah memberikan soal selidik kepada nelayan di kawasan Kuala Terengganu Selatan. Objektif-objektif kajian ini adalah menentukan tahap kesedaran semasa tentang keselamatan dan mengenal pasti faktor yang mempengaruhi kesedaran mereka. Bagi metodologi, sumber-sumber utama diperolehi melalui penggunaan soal selidik dan pemerhatian di lapangan. Kemudian, sumber-sumber sekunder diperolehi melalui penerbitan, jurnal, artikel, tesis dan teks-teks yang berkaitan dengan kes kajian. Analisis diskriptif tentang soal selidik dijalankan mengikut bahagian A, B dan C dan tahap kesedaran mereka dibincangkan untuk mendapatkan keputusan yang lebih tepat di samping mencapai objektif-objektif kajian ini.

## **ABSTRACT**

Fisherman is one of the most dangerous jobs and highly risk. Safety awareness is important for every fisherman from beginning and the end of the trip to the sea. Study on safety awareness among fishermen at Kuala Terengganu is closely related to their awareness of safety where they need to be aware of each of their behavior. This project adapts the method of questionnaire by giving to the fishermen in Southern area of Kuala Terengganu. The objectives of this study are to determine the current level of safety awareness and identify factors affecting their awareness. For the methodology, the main data obtained through the use of questionnaires and field observations. Then, secondary data obtained from publications, journals, articles, theses and texts related to the case study. Descriptive analysis of the survey conducted accordance to sections A, B and C, and they discussed the level of awareness to get more precise results while achieving the objectives of this study.
